Figure 2. Age-standardized incidence rates (per 100,000 men and women) of head and neck cancer in the world, 2008. Data source is International Association for Research on Cancer (IARC) Globocan 2008 (4.5-2011). Incidence rates per geographic region are represented in various shades of blue per index.
Comprehensive Management
Comprehensive Management

• Prevention/ Diagnosis
  • Primary care physician, dentist, optometrist

• Surgical Care
  • Head/ Neck Surgery (ENT, OMFS)
  • Reconstructive Surgery

• Adjunctive Treatment
  • Medical Oncology
  • Radiation Oncology

• Rehabilitation
  • Speech Therapy
  • Physical Therapy
  • Social Work
Strategies for Success
Reconstructive Survey

• Scalp & Craniectomy
• Orbital Exenteration
• Glossectomy
• Mandibulectomy
• Laryngectomy
Case 1

Recurrent/ Atypical Meningioma
Radiation (EB, GK)
Right Parieto-Occipital Scalp
Recurrent/ Atypical Meningioma
EB, $\gamma$-Radiation

Right Parieto-Occipital Scalp
Case 2
s/p bone flap explant and free ALT
Staged PEKK cranioplasty, Flap revision
Case 3
Case 4
Case 5
Case 6
Case 8
